# Project Proposal: SUB Students Portal

---

Md. Khaled Saifullah Sadi(UG02-47-18-020)

Department of Computer Science and Engineering  
State University Of Bangladesh

A student portal acts as an online portal between students and the authority .The system is designed for State University Of Bangladesh. Every student can use this portal . It contains an admin who can see details of students. Students can register here using their ID number. Then they login using their ID password and edit their profile details and image. Using this portal students can complete their Course Registration .

1. Introduction
2. Using Tools
3. Features
4. Admin Panel
5. Conclusion And Future Work
6. Thank You

# Introduction

---

A website is a collection of web pages, thus a portal is a collection of services. The student portal is a gateway to connect many web applications which is useful for doing student activities. This portal is only for State University Of Bangladesh.

## Using Tools

---

Project is to maximize access to the information resources required to improve existing teaching and learning practices in education and aims to establish a technologically aware society. SUB Student Portal's frontend is implemented by using HTML, CSS, JavaScript and backend uses PHP and MySQL. There are mainly 2 users in this application admin and student.

# Features

---

# Features

The features of this application is divided into 9 module. They are,

1. User Module
2. Online Course Registration
3. Public Notice
4. Private Messege
5. Improvement Registration
6. Subject Add / Drop Module
7. Semester Fee Calculation
8. System Settings
9. Backup and Restore

## Admin Panel

---

Admin panel has those featuses . So that, an admin can control all things in SUB Students Portal.

1. Approve Students Profile
2. Send Message to students.
3. Send Public Notice
4. Approve Course Registration
5. Approve Improvement Registration
6. Add Registration Dateline

## Conclusion And Future Work

---

# Conclusion

SUB Students Portal can be used by educational institutions to maintain their student records easily. Achieving this objective is difficult using the manual system as the information is scattered, can be redundant, and collecting relevant information may be very time-consuming. All these problems are solved by this project. This system helps in maintaining the registration process . It can be easily accessed by authority and kept safe for a long period of time without any changes.

In future , we add more features in this SUB Students Portal.

1. Result System
2. Community Forum
3. Semester fee payment

Thank You
