# Project Proposal: SUB Students Portal

---

Md. Khaled Saifullah Sadi(UG02-47-18-020)

Department of Computer Science and Engineering  
State University Of Bangladesh

A student portal acts as an online portal between students and the authority .The system is designed for State University Of Bangladesh. Every student can use this portal . It contains an admin who can see details of students. Students can register here using their ID number. Then they login using their ID password and edit their profile details and image. Using this portal students can complete their Course Registration .

1. Introduction
2. Using Tools
3. Students Features
4. Admin Panel Features
5. Conclusion And Future Work
6. Thank You

# Introduction

---

A website is a collection of web pages, thus a portal is a collection of services. The student portal is a gateway to connect many web applications which is useful for doing student activities. This portal is only for State University Of Bangladesh.

## Using Tools

---

SUB Student Portal's frontend is implemented by using

1. HTML
2. CSS
3. JavaScript

And backend uses

1. PHP
2. MySQL

There are mainly 2 users in this application admin and student.

There are mainly 2 users in this application admin and student

1. Admin
2. Student

Also nonregister user can use this portal. But they can use only limited features.

## Students Features

---

# Features

The features of this application is divided into 7 module. They are,

1. User Module
2. Online Course Registration
3. Public Notice
4. Private Messege
5. Improvement Registration
6. Subject Add / Drop Module
7. Semester Fee Calculation

## Admin Panel Features

---

Admin panel has those feature . So that, an admin can control all things in SUB Students Portal.

1. Approve Students Profile
2. Send Messege to students.
3. Send Public Notice
4. Approve Course Registration
5. Approve Improvement Registration
6. Add Registration Dateline
7. System Settings
8. Backup and Restore

## Conclusion And Future Work

---

# Conclusion

SUB Students Portal can be used by educational institutions to maintain their student records easily. Achieving this objective is difficult using the manual system as the information is scattered, can be redundant, and collecting relevant information may be very time-consuming. All these problems are solved by this project. This system helps in maintaining the registration process . It can be easily accessed by authority and kept safe for a long period of time without any changes.

In future , we add more features in this SUB Students Portal.

1. Result System
2. Community Forum
3. Semester fee payment

Thank You
